Technology Lending Guiding Principles

As an extension of our mission to “provide resources and services essential for excellence in teaching, learning, research, and scholarship,” Memorial Library will provide a selected technology lending program as part of our commitment of equitable access for the Berry community. To this end, Memorial Library will provide resources necessary to support the exploration of technology and its pedagogical uses by the Berry community.

In support of the:

College Strategic Plan 2013-2022: 1.11 Berry College will graduate students who are “life ready,” prepared to be agents of improvement through the integration of rigorous academic learning with meaningful applied learning experiences and a heart for service. 11) Integrate technology into the residential liberal arts experience to enhance learning.

Memorial Library’s Institutional Effectiveness Plan 2012-2017 Goal 2e: Become the intellectual commons where users interact with ideas in both physical and virtual environments to expand learning and facilitate the creation of new knowledge. E) Provide opportunities for users to experiment with and incorporate new technologies into their study and research.

QEP 2: Provide a structure through which students can articulate and demonstrate how they have examined their experiences and made connections through an eportfolio. (Resources for content creation).
